ICONA brings you customised solutions in patient care. For us it's a matter of people and patients first – you, your clients and their animals. It's about getting to know you and your needs, then working together to find the right solution – big or small.

Established in 2003, ICONA has experience in both private and public healthcare practices, including major fit outs for institutions. We offer a winning combination of world-leading, trusted products at exceptional value and a commitment to responsive, efficient service. The extensive expertise of our people allows us to offer a one-stop-shop of sales, support, IT, project management, technical expertise, clinic design-and-build including re-locatable and mobile facilities.

Whatever your needs, whether it's sourcing new equipment, installation and maintenance, surgery design, development and construction, or outfit and refurbishment, ICONA can help get you started and keep you running.

Let's start a conversation.

Talk to us today about your needs.

Dentistry

VetPro 1000 Dental Delivery System

The VetPro 1000 is a robust, mobile unit with precise controls designed specifically for veterinary dentistry. The self-contained unit is one of the quietest on the market with an average sound level of only 40 dB. The oil-free compressor means no oil to contaminate your patient, your work area or your valuable handpieces.

Handpieces activate automatically when lifted from their holders so your focus can remain on your patient.

- Optional fibre optic High Speed handpiece and LED scaler improve oral cavity visibility
- Toggle easily between two water bottles without de-pressurising
- Single foot switch operates all handpieces
- Medical grade castors and sturdy ABS plastic construction
- Two Year Warranty

Shown here with optional suction unit

VetPro Dental Handpieces

Lightweight handpieces made in the USA. Ceramic bearings for lower maintenance and quiet operation.

The High Speed handpiece features a push button to change burs and is available with or without fibre optics. The Low Speed handpiece swivel adaptor reduces hand fatigue.

MK-dent Germany Handpieces

Designed for comfort and safety and manufactured to exacting European standards. The range offers quality at an affordable price. Ask us for more details.

Bonida Intra Oral Camera

The Bonida Intra Oral Camera has the features of an expensive model at an affordable price. Use as a diagnostic tool or to aid customer education. Capture intra oral images before and after procedures and then save or send them quickly and easily. Image capture button on each side of camera for left or right-hand operation.

- Direct USB 2.0 connection
- High quality barrel type lens
- High Resolution Super HAD CCD image sensor (SONY 1/4")
- Also available in HD model
- Two Year Warranty

Dental X-ray

VetPro DC X-ray

Do you need a dental X-ray system that's veterinary specific, easy to use and well made?

The Midmark VetPro Digital Dental X-ray Systems are designed to deliver exceptional digital images with the smallest possible focal spot and adjustable mA, kV and time settings.

The unique tube head handle allows you to position the X-ray source with one hand. High tolerance, frictionless joints and a heavy duty dual braking system enable precise, stable placement.

- Exceptional image quality with film, digital sensors or phosphor plates
- 0.4 mm focal spot (smallest in the industry) produces visibly higher resolution images
- Flexibility to customise settings to suit your practice
- Superior construction – made in the USA

Combine the VetPro DC with a VetPro DR Digital Sensor System for increased efficiency. DR sensors, size 1 or 2, are designed to use 16-bit image processing and 4,096 levels of grey to deliver detailed diagnostic images in less than 5 seconds.

Rounded corners mean easier positioning in tight spaces for better capture of roots.

Wall mounted and mobile options available.

Nomad Pro2 Handheld X-ray System

The NOMAD Pro2 handheld X-ray unit is ideal for dental work, limbs and extremities.

Safe and lightweight, only 2.5 kilos, it's easy to take the NOMAD Pro2 to your patient wherever they are. Use the icons on the top pad to select animal size, media (film, digital sensor, or phosphor plate) and type of radiograph needed. Then, simply aim and pull the trigger.

*Mobile base rotates 360 degrees
for easy repositioning.*

Image Readers

FireCR Flash Veterinary Reader

What do you look for in an image reader?

- Fast, easy to use
- Meets small animal, large animal and dental needs
- Crystal clear image quality
- Easy to enhance, enlarge, duplicate and send images
- Accepts three standard cassette sizes

Maybe you also look for...

- Low maintenance
- Upgradable, if imaging volumes increase

The FireCR Veterinary Reader and QuantorVet+ Imaging Software tick all these boxes. Ask ICONA for more information.

Use table top or wall mounted.

Reader comes with a 35cm x 43cm and a 24cm x 30 cm cassette. An 18cm x 24cm cassette is also available.

Software that's fast and easy to use with unlimited upgrades.

VetPro CR Digital Dental Reader

The VetPro CR Dental Reader was designed to produce fast, high-quality images that are easy to manipulate, store and send. The unit is small enough for the consult room allowing you to interpret images while pet owners are present.

To use, simply place the imaging plate on the sliding magnetic tray and the VetPro Reader transfers the image to the software and then erases the plate for re-use.

Comes with five easy-to-place imaging plates, four size 2, one size 4c, hygienic bags and a protective storage box. Additional plates are available in sizes 0, 1, 2, 3 and 4c.

- LCD touch screen interface
- USB connection
- Easy-to-learn software requires little training
- Two Year Warranty

Dental ready cassette and imaging plate sizes 0, 1, 2, 3, 4c and 4 are available.

Instrument processing

Midmark M9 and M11

Midmark M9 and M11 sterilisers are reliable, easy to use and produce thorough steam penetration.

An LCD display shows the cycle, temperature and exposure time selected as well as the cycle time remaining.

For safety, if the door is not properly closed or the water level is low, sterilisation will pause and the LCD display will indicate accordingly.

Automatic door opening speeds up drying times and produces dry, sterile instruments every time.

The fill port and drain tube are located in the front of the unit making filling and draining easy.

Two Year Warranty

Both units require standard 10 amp power. Optional printer accessory available for both models.

Midmark VetAssure B18 and B23

The larger capacity Midmark VetAssure Sterilisers sit comfortably on a standard work bench. Fast, pre-programmed cycles ensure rapid throughput with no bottlenecks to interrupt your instrument processing flow.

Class B cycles ensure maximum steam-to-instrument contact with even temperature distribution, resulting in thorough sterilisation of intricate instruments, including those with long lumens. A vacuum pulse at the end of the cycle guarantees fast, full drying of the load.

Either use the self-priming pump to fill your steriliser, capacity up to 10 cycles, or connect to your treated water supply. Drain manually after several cycles or connect the unit to your drainage system.

Two Year Warranty

Both units require standard 10 amp power. Printer is standard, USB data logger is optional.

Anaesthesia

Over 50 years of quality manufacturing experience goes into every Matrix anaesthesia machine. We've featured the most popular Midmark small animal machines but please ask us about large animal and non-rebreathing systems, ventilators and accessories.

The Matrix VMS Plus offers two shelves to keep monitors and equipment within reach.

A long-standing favourite with veterinary professionals for quality, safety and easy use, the VMS Plus now features Midmark's occlusion valve with safety relief.

The dual vapouriser mounting capability allows you to easily switch from one to another.

- Includes vapouriser mounting kit, 1L and 2L breathing bags, 15mm and 22mm breathing circuits
- 0.2 to 4LPM dual view flowmeter - switch from standard to magnified view at the touch of a finger
- CO₂ absorber with 'Quick Release' lever for easy replacement
- Accepts Matrix VIP 3000® and TEC 3 vapourisers
- Five Year Warranty

Other Midmark models and anaesthesia accessories available.

Tabletop and wall mount systems also available.

Table top system also available.

The Matrix VME2 places all your anaesthesia equipment on a compact mobile post. You can add shelves, a second flowmeter, second vapouriser, occlusion valve with safety relief and an emergency air intake valve.

Easy-to-view inhalation/exhalation valves allow 'at-a-glance' monitoring of respiration for patient safety.

- Includes vapouriser mounting kit, 1L and 2L breathing bags, 15mm and 22mm breathing circuits
- 0.2 to 4LPM dual view flowmeter - switch from standard to magnified view at the touch of a finger
- Accepts Matrix VIP 3000® and TEC 3 vapourisers
- Five Year Warranty

Matrix VIP 3000 veterinary anaesthetic vapourisers offer accurate anaesthesia delivery under all conditions. The VIP 3000 uses proven design principles to ensure output concentration is virtually unaffected by flow rate, temperature variations, duration of use, liquid level or back pressure fluctuation, within its clinical range.

Isoflurane or Sevoflurane specific models are available with a choice of either well-fill or key-fill. Features include an easy-to-read dial, safety lock and large sight glass for liquid level monitoring.

Five Year Warranty.

Patient Monitoring

The Cardell 9402 is compact, lightweight and durable. It's designed to fit anywhere you need it: on a narrow shelf, hanging on a cage or IV stand, or in a carry bag for ultimate mobility. The 9402 features technology designed to provide superior accuracy and works in low perfusion and during patient motion. A reflectance SpO₂ sensor is available for use on the base of the tail during dental procedures.

- Provides systolic, diastolic, mean arterial pressure and heart rate in seconds
- Pulse rate range from 20 to 300 beats/minute
- Screening mode automatically calculates average of last five readings
- Set auto measurement from 1-90 minutes
- Stores 99 minutes of readings or the last 5 hours
- Three Year Warranty; One Year on battery pack

The Cardell Touch Monitor is designed to be safe, reliable, and user-friendly. With veterinary specific algorithms and exclusive Cardell® Blood Pressure Technology, the Touch is the latest innovation from the most trusted name in veterinary vital signs monitoring.

- Simple patient set-up with intuitive touch screen
- Customisable alarm settings for up to three users
- Optional integrated three-channel graphical printer
- Features world class Cardell® BP, Nellcor™ SpO₂ technologies
- Facility to upgrade to CO₂ monitoring by adding a Respironics side-stream or mainstream CO₂ module
- Two Year Warranty

Lighting

The Midmark 255 LED Procedure Light delivers the true, reduced-shadow, white light needed to properly match shades, identify details and diagnose tissue.

Low energy use, closed units are easy to clean. Easily position the light precisely where you want it – no drifting.

Single wall, ceiling or mobile options also available.

The Luvis-S200 small operating light allows you to focus the light field using the autoclavable handle. Focal size can be adjusted from 18 to 30 cm.

Intuitive control panel makes adjustment of intensity and colour easy.

High CRI helps reduce eye fatigue.
