

Preference®

Productivity refined

Preference by A-dec

Dental cabinetry should do more than store ancillaries and supplies. It should increase productivity, streamline workflow and save precious time. Designed specifically to be an integral part of a total operatory management system, Preference by A-dec® makes it all possible.

A-dec has worked with the dental community creating solutions that make your job more efficient and less strenuous for more than 40 years. Our dental cabinetry is no exception. It's easy to clean. Built to withstand the unique demands of an operatory. And requires no twisting or turning to reach ancillaries. Every precise detail is the result of hours of research and collaboration with the goal of boosting productivity and ensuring reliability. Just like our equipment, we stand behind our cabinetry well after it's been installed in your operatory. And just like our equipment, we're always reengineering features to improve usability; like changed latches, updated colors, reduced solid surface and countertop thicknesses (2 cm), and darkened cabinet subbases. We've also added the option of exquisite, easy-to-maintain quartz countertops.

Fresher. Sleeker. More modern. Now there are even more reasons to refine your operatory with Preference. We invite you to sit down with your local, authorized A-dec dealer to discover what Preference can do for you. If the standard Preference Collection®, Preference Slimline™ or Preference ICC® dental cabinetry choices don't precisely fit, we'll work with you to create a solution that does. After all, if it's not Preference by A-dec, it's just cabinetry.

Preference Collection

SWING-OUT SHELVES
Rotate toward the operator for
easy access to equipment.

treatment consoles

Everything in its place and a place for everything. That's exactly what you get with the Preference Collection 5580 treatment console. With a redesigned midsection, we've streamlined the appearance and functionality. With the center partition removed, we've opened up the usable space to accommodate a variety of larger ancillary devices. We've also increased the capacity of the wire chase making it easier to run cables or utilities through the cabinetry without cutting additional holes.

Think about how you work. What equipment do you use now, and what do you see yourself using in the future? (See ancillary checklist.) Imagine yourself at your optimal performance. What does that look like? When creating a system that meets your specific needs, think about where you look for your equipment and what instinctively feels natural. With these considerations in mind, you'll be well on your way to creating a streamlined environment that works the way you do.

ADJUSTABLE GLASS SHELVES
Accommodate different-sized
tubs, trays, and cassettes.

EQUIPMENT DRAWER
 Delivers ancillary devices right where you need them.

CLOCK TIMER
 The refreshed clock timer matches the color and appearance of the new A-dec 300 and revamped A-dec 500 product lines, yet keeps the same functionality.

The 5580 is built to work. Storage options bring equipment within arms' reach of you and your assistant. Everything is right there at your fingertips, including your round worksurface, so there's no stretching or straining to reach what you need. And, with pass-through storage options, you get a treatment console that creates a natural flow of materials into and out of the operator.

Think about the ideal environment to best serve you and your staff and ask yourself, isn't it time your space accommodated you instead of the other way around?

PRODUCTIVITY AT 12 O'CLOCK
 From 12 O'clock, everything is within reach. Preference Collection cabinetry is designed so you can reach everything you need with minimal movement.

MONITOR TRACK MOUNT
 Slides back and forth to provide exceptional monitor positioning.

ICV™
 Simplifies vacuum-line cleaning in 3 easy steps.

Ancillary Checklist

What equipment do you use now? What do you see yourself using in the future?

	Current	Future
1. Amalgamator	<input type="checkbox"/>	<input type="checkbox"/>

UNDERMOUNT PORCELAIN SINK
Allows you to quickly and thoroughly wipe down the countertop.

FOOT ACTIVATION
Promotes infection control by eliminating a touch point.

SOFT-CLOSE
Gain the ease of doors and drawers gently opening and pulling themselves shut.

CUP AND TOWEL DISPENSER
Offers hidden, convenient access to cups and towels.

CPU STORAGE
Features a vent and USB powered fan for increased ventilation.

Did You Know?

If you ever move offices, you can take Preference cabinetry with you—it's moveable and resellable.

central consoles

Increase efficiency, get the most out of your space, and save money. It's easy thanks to the Preference Collection 5543 central console.

Where there were once five treatment rooms, you can now fit six. In an open floor plan, our central consoles create a functional wall that allows you to share equipment, utilities, and a wash station between two treatment rooms. So, you not only save space, you reduce equipment expenses. And, if privacy is a concern, the 95" tall central provides an ideal solution.

accessory consoles

In a fixed- or semi-walled floor plan, Preference Collection accessory consoles offer an abundance of storage, wash station, and delivery system options. Equipment and materials are well organized and easy to reach. The rounded and angled countertops allow clear access into the treatment room. Preference Collection upper storage and dispensing units keep cups, towels, and masks discreetly stored, creating a patient-friendly environment.

Add a professional look and
simplify cleaning.

Did You Know?

With built-in features such as task lighting, hospital-grade UL-listed electrical outlets, lead lining, sinks and faucets, Preference cabinetry can greatly reduce construction costs.

Preference Slimline 5536 utility console and 5731 upper storage unit

Preference Slimline

Do more with less. If space is at a premium, Preference Slimline offers a space-saving profile big enough to accommodate small equipment, utilities, and emergency supplies, but small enough to fit in tight places. The trimmed down equipment modules support A-dec 500® 12 o'clock and side delivery systems so you can free up precious floor space and eliminate clutter.

Preference Slimline provides the solutions you need if space is limited—room enough for your patients, your staff, and your equipment.

materials management

Have you thought about what a streamlined flow of materials in and out of the treatment room could do for you? When you have an efficient materials management system in place, workflow becomes quick, consistent, and natural. Everything you need for a procedure is ready for you when you need it—every time. This is possible with a central storage system that combines both the Preference ICC sterilization center and the Preference Collection 5580 treatment console.

In this streamlined process, materials and instruments are loaded directly from Preference ICC into tubs and trays or cassettes. Then your dental team delivers them to the 5580 storage shelves and takes the used materials back to the sterilization center. For the ultimate in efficiency, the 5580 pass-through option allows your staff to collect finished materials and replace them with fresh ones without disturbing procedures in the treatment room.

Did You Know?

Studies have shown that six minutes are lost every time an assistant leaves the operatory. If he or she leaves the room ten times a day, that's 60 minutes: The equivalent of one patient time slot. Think what you could accomplish by gaining just 10 percent more time in your day.

Preference ICC sterilization center featuring the award-winning Lisa Sterilizer and Assistina handpiece maintenance system.

excellence is in the details

Sure a custom cabinetmaker or contractor can build storage cabinets for you. But in the operatory, you have specific needs. A-dec has listened to doctors tell us what's most important to them for more than four decades. The result is dental cabinetry built specifically for the way you work—right down to the last detail.

Asepsis. The seamless blend between the solid surface sink and countertop, all the way to the backsplash, won't collect dirt to further simplify cleaning. Knee- or foot-activation systems allow you to turn faucets on and off without using your hands. And with new soft-close doors and drawers, you not only reduce potential touch points, but you're assured everything opens and closes with smooth, firm ease.

Reliability. A-dec cabinetry withstands the daily rigors of an operatory. Radiused edgebanding seals and protects the edges of doors and drawers, while pretreated, heavy-gauge steel subbases resist rust and corrosion.

Flexibility. Storage options such as slide-out shelves, interior drawers, and swing-out shelves position to accommodate new ancillary equipment. Thin, strong tempered glass shelving allows for nearly any size tub, tray, or cassette and cleans easily.

Details like these do more than increase efficiency and protect your investment. They allow you to focus on what really matters: Your patients.

SOLID SURFACE COVERED BACKSPASH
Cleans easily and won't collect dirt.

UNDERMOUNT SOLID SURFACE SINK
Simplifies cleaning.

LESS VISIBLE SUBBASE
While the long-lasting heavy gauge steel subbase is still rust and corrosion resistant, the darkened color is more aesthetically pleasing and less visually intrusive. It blends right in.

ROUNDED-END MODULES
Eliminate sharp corners and streamline cleaning.

Did You Know?

The cost of including cabinets in your lease over time is far more expensive than buying them outright, and you own them in the end.

Did You Know?

Just like dental equipment, dental furniture is considered capital equipment and can be eligible for a Section 179 tax deduction.

create a beautiful finish

Good use of color creates a mood and keeps the room visually balanced. When it comes to style, no two practices are exactly the same. No matter what combination you choose from our broad palette of laminate and solid surface colors, including our new quartz collection, Preference Collection ensures a functional, beautiful operator for years to come. If there's something you don't see in our Preference line, we can develop a solution just for you with Preference Custom.

Like what you've seen? For a closer look, order upholstery, laminate, solid surface, and quartz color samples directly through our website, www.a-dec.com — Explore A-dec Color. Your local A-dec dealer can help you discover how easy it is to create a professional, aesthetically pleasing operator from start to finish.

A complete solution

At A-dec, we offer more than chair seating that balances patient comfort and operator access. Or a delivery system with exceptional integration. We offer a complete solution. When you add A-dec Preference Collection® dental cabinetry to your operatory, you get cabinetry that's designed to increase efficiency and built to accommodate you and how you work.
