# STIMULUS Instant Asset-Writeoff threshold increased from \$30,000 to \$150,000!

DEADLINE  
NOW  
EXTENDED

**The government is increasing the instant asset write-off threshold from \$30,000 to \$150,000, it is also expanding access to the scheme to include businesses with aggregated annual turnover of less than \$500 million (up from \$50 million).**

This scheme is only available for the remainder of the financial year, which means it covers any assets purchased before 30 June.

The threshold applies on a per-asset basis, meaning businesses can write off multiple assets. It also applies to both new and used assets, so long as the assets have been purchased in the current financial year.

The government said in the 2017-18 financial year, more than 360,000 businesses used the instant asset write-off, claiming deductions valued at more than \$4bn.

For more information, see the fact sheet from the Treasury, as well as the Treasury website.

Stimulus package:  
PM - Scott Morrison

## Government Stimulus Offers

### SME Guarantee Scheme

Under a new SME coronavirus guarantee scheme, the government has pledged to guarantee 50% of new short-term, unsecured loans to small and medium businesses.

The government will guarantee up to \$40 billion in new lending, in a bid to further encourage new credit to SMEs.

In addition, for lenders providing credit to existing SME customers, the government is providing a temporary exemption from responsible lending obligations, meaning small business owners could access cash more quickly and efficiently.

### Pause on small business loan repayments

There is also relief for small businesses already repaying loans. On Friday, the Australian Banking Association announced Aussie banks are pressing pause on repayments for small business loans.

This is expected to apply to more than \$100 billion in existing loans, and could return up to \$8 billion to Australian businesses.

**Presidential urges clinic owners to please ensure you are making the most of the incentives and funds relief available to small businesses during this challenging period. Please also discuss what is applicable in your particular situation, with your accountant or financial advisor.**

# A-dec 200

Proven • Efficient • Smooth

## \$25,990

**SAVE \$2,295**

### Package Includes:

- Chair with Seamless upholstery
- Support centre with cuspidor
- A-dec relay module
- Delivery System with integrated deluxe touchpad
- Assistants instrumentation and touchpad
- NEW 300 LED light

**A-dec 200 is a great value package, complete with new features for added accessibility and comfort.**

**All from the people who build the most dependable dental equipment in the world, A-dec.**

A hands-free solution for extra-oral aerosol capture.

### A-dec® Third-Hand HVE Holder

Efficiency and safety come together in a practical solution for aerosol capture. The **A-dec Third-Hand HVE Holder** makes it easier to practice two-handed dentistry while maintaining essential aerosol control. The flexible arm securely positions the HVE tip to within 1" of the oral cavity—delivering precise, effortless aerosol capture while keeping hands free for scalers and instruments. It's a simple, affordable way to bring more functionality to your surgery.

Glide bar clamp attaches securely to your A-dec chair with no special tools needed.

Flexible design accommodates patients of all sizes, for easy entry and exit from chair.

From hands-free to hands-on: Simply lift the HVE out of the holder for direct control.

Easily adjusts for right- or left-handed clinicians, and four-handed procedures.

#### PRODUCT FEATURES

- Provides hands-free aerosol capture with existing 15mm or 11mm HVE
- Allows access to within 1" of oral cavity
- Flexible arm for easy positioning
- Radius design for right- and left-handed users
- Accommodates patients of all sizes
- Fits most A-dec dental chairs
- Fast and easy to install

Meet nano.

NEW

**Ti-Max nano**

Contra-Angle

**Small, but mighty.**

Delicate and precise, a natural extension of your hand.

10% smaller and lighter\*

**SOLUTIONS AND PROMOTIONS FROM NSK**

## Ti-Max nano

### Shorter, Perfectly Balanced

Lighter and perfectly balanced, "Ti-Max nano" handpieces are designed to be a natural extension of the clinician's hand, ensuring smoother procedures. Even during procedures that require delicate and precise movements, a "nano" handpiece faithfully mirrors the user's intent. NSK continues to challenge the limits of manufacturing to pioneer next-generation contra-angles.

#### Smart Miniaturization Enables Perfect Balance

NSK's Ti-Max nano preserves the high performance that NSK contra-angles are known for. These new handpieces are approximately 10 % smaller and lighter than conventional models and in combination with NLZ micromotor series, together they give you the ease of manoeuvrability and accuracy you are used to from your air-turbine.

#### Perfect Balance

Reducing size and weight shifts the centre of gravity to an optimal position, dramatically reducing fatigue during procedures and improving your fingertip dexterity.

#### Clean Head System

The Clean Head System has a labyrinth seal mechanism that reduces blood and foreign matter from entering the handpiece head from the oral cavity. As a result, the ball bearings and mechanical parts last longer.

#### Smaller and Slimmer

nano95LS has a smaller head and slimmer neck dimensions, which increases accessibility and visibility to posterior and difficult access areas.

## Ti-Max nano line up

Exceptionally small head and slim body / Clear visibility and easy access / Amazingly quiet operation / Cellular Glass Optics / Titanium body with scratch resistant DURAGRIP / Clean Head System / Push Button Chuck (exclude nano65LS) / Outstanding Durability.

## REDUCE AEROSOLS GO ELECTRIC

Anti-Retraction  
Valve prevents  
suckback/  
contamination of  
the water line

Accurate and clean margins are the most important factor when achieving the best digital scan. Electric driven speed increasing handpieces are the best options when looking for the control you need to produce accurate margins.

### What is a speed increasing handpiece?

A contra-angle that does everything a turbine (high speed) does and uses the same FG burs. But it has incredible 'torque' originating from the micromotor which puts it in a league of its own and puts you in total control – not more loss of power as you come into contact with the tooth. Choose your speed. Save time cutting preps.

### What motor do I need to use speed increasing handpieces?

It must be an electric micromotor (not an air motor) as the gears inside (usually 1:5) need the electrical power to run at a high speed. These ultimate brushless electric micromotors can be retro fitted by an engineer or come as an option when buying new chairs. NSK's NLX micromotors offer a powerful 3.4Ncm of torque and the new NLZ micromotor offers increased torque up to 4.2 Ncm.

**Designed to screw on a regular mouth mirror handle.**

Acteon micro mirrors make the access to the apex easier and allow to get accurate vision of the pulp chamber.

Ideal to access all tiny spaces with different sizes and shapes available.

The size and shapes of the mirrors allow a precise and perfect controlled gesture to microscopic surgical site.

**Pure reflect technology:**

- 100% level of colour reflexio
- 0 image distortion

**BUY 3 Micro Mirrors GET 1 x 5 Pack of Expasyl Exact FREE**

## MEDIT *i700*

CALL US  
FOR A PRICE!  
1800 773 743

- Emits light in the most efficient part of the spectrum
- Only 6 to 12 seconds to polymerize 2mm of any composite
- Choice of three modes for optimal curing of all types of composite
- Fast mode, Pulse mode and Ramping mode.

## Scan & Communicate

### Smart Scan Filtering

Remove unnecessary soft tissue data which is one of the biggest challenges when performing scans.

### Medit Ortho Simulation

Help the patient visualize potential results of an orthodontic treatment.

### Cloud-based Service

Store all data in the cloud. Work on your original scans, archive your digital impressions and orders, manage your cases wherever you are.

### Smart Color Filtering

Automatically filter the color out during scanning, reducing the number of artifacts and making retraction easier.

### Medit Smile Design

Show the patient their future smile or help them envision a braces treatment.

### Web Viewer & Case Talk

Experience smoother communication, with partners. View scan data on any device and share notes. All data is stored securely.
